

I am

A Doctor

I'm trying to

Perform a  
surgery

But

There is risk of infection  
and lot of time being  
consumed especially when  
the patient's life is at stake

Because

I need to browse through the  
radiology images like X-ray,  
with the same hands by  
which i'm performing surgery

Which makes me feel

Unhygienic,  
Untidy, Infectious  
and Frustrated
