

Create HTML Pages

- We are using HTML to create the front end part of the web page.
- Here, we have created 3 html pages- home.html, intro.html and index6.html
- If home.html displays home page.
- Intro.html displays introduction about the hand gesture recognition
- index6.html accepts input from the user and predicts the values.
- We have also use JavaScript-main.js and CSS-main.css to enhance our functionality and view of HTML pages.
